

EEV on September 7, 2005

Part I: EEV in Year Two Reflection

Fill out the EEV questionnaire in a quiet spot where you can think hard about the content and structure of what you might develop this year in the EEV.

Part II: EEV Conversation as Social Vehicle & Construction

We will begin together at 5:30. Until then, please stand up and join many different people, exploring EEV possibilities for the year in conversation with them. Your task is to get to any of the people you might like to work with and also to talk through topics that are possible for you and topics of interest to others. Use this social time to "catch up," but "catch up" through the vehicle of EEV.

Notes:

Use this space to take notes. You will want to refer to them during the week as you decide which group to join and which broad topic area you will address this year.
